

Policy Number: G130

GOVERNANCE

SUBJECT: Environmental Policy

POLICY STATEMENT

One of the goals of Catholic Education is to encourage students and staff to develop respect for the environment and become committed to the wise use of resources. Attaining this goal requires a knowledgeable concern for the quality of the environment, the careful use of natural resources and the humane treatment of living things.

The Sudbury Catholic District School Board supports, promotes and practices programs for students and staff that will foster the concept of the stewardship of the earth and the wise use of natural resources.
